

# Invasive Fungal Infection in War Wounds

*A Combat Casualty Care Clinical Practice Guideline brought to you by the  
Joint Trauma System, DoD Center of Excellence for Trauma.*

## Updates

- ❖ Wound epidemiology to include surgical and wound healing outcomes
- ❖ Updates on the use of IV voriconazole in those with impaired renal function
- ❖ New guidance on posaconazole administration
- ❖ Updates on use of Dakin's half-strength solution
- ❖ Pan-fungal PCR as a potential rapid molecular diagnostic modality
- ❖ Isavuconazole as a mold active triazole
- ❖ Tissue sample handling considerations to increase culture yield of fungi (i.e. Mucor)
