

Damage Control Resuscitation

Fluids for Resuscitation

Guidance: To treat and reverse hemorrhagic shock and to provide warm whole blood as close to the time-of-injury as possible.

**Low Titer O
Whole Blood**

**(LTOWB) is the
FLUID OF CHOICE**

**for damage control resuscitation
(DCR).**

**If LTOWB
is unavailable,
administer pre-
hospital DCR fluids
from most to least
preferred**

- ▼ Plasma, platelets, and red blood cells (RBCs) in a 1:1:1 ratio
- ▼ Plasma and RBCs in a 1:1 ratio
- ▼ Plasma or RBCs alone
